First meeting
with your mentor
(Mar 4 -14)

Working on the project

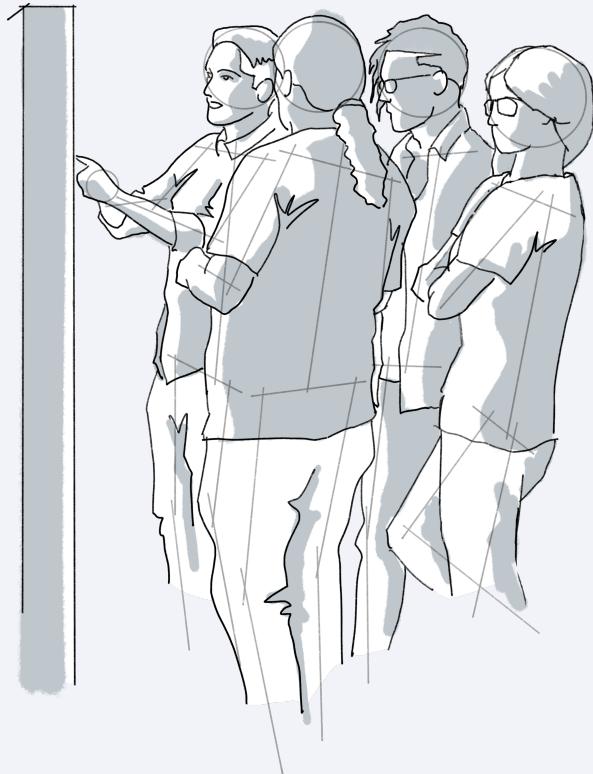

First meeting with your mentor (Mar 4 – 14)

- Get to know each other
- Understand each other's expectations from the program
- Define project scope and deliverables
- Discuss weekly commitment and schedule regular meeting
- Let your mentor know your other commitment ahead to plan for it: exams, vacations, etc.

Mid-term review (Apr 1)

- By this point your project idea should be well defined and you have started working on it for two weeks.
- It's a good time to share your refined project idea and get feedbacks from other advocates and mentors
- 3 min presentation about your project idea and progress

Final showcase (Jun 3)

- At this point, your project should be complete. You should be able to present your results.
- For code projects, PR should be submitted and at least ready for review
- For content projects, they should be ready to be published in Qiskit Medium or other platforms

Meet your
mentor!
